-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 1-7 and 9-16 in the reply filed on August 6, 2007 is acknowledged.

Specification

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: Claim 1 recites the terms "first level" and "second level." There is not support in the specification for these terms.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 2-7 and 9-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3694

5. Regarding claims 2-7 and 9. The claims recite the term “substantially.” It is unclear as to how this term is adding to the limitations of the claims.

6. Regarding claim 10. Claim 10 recites the limitation “wherein said further contracts have terms as defined in claim 1.” It is unclear whether the contract must include at least one term from claim 1 or whether the contract may include zero terms from claim 1.

7. Regarding claims 11-16. The claims recite the limitation “wherein said standardized contract has terms as defined in any of claims 1, 9, or 10.” It is unclear whether the contract must include at least one term from claims 1, 9 or 10 or whether the contract may include zero terms from claims 1, 9 or 10.

Claim Rejections - 35 USC § 101

8. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

9. Claim 16 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

10. Regarding claim 16. In many instances it is clear within which of the enumerated categories a claimed invention falls. The question of whether a claim encompasses statutory subject matter should not focus on which of the four categories of subject matter a claim is directed to -- process, machine, manufacture, or composition of matter -- but rather on the essential characteristics of the subject matter, in particular, its practical utility. In the instant invention, the claimed subject matter is directed towards nonfunctional descriptive material.

Art Unit: 3694

Nonfunctional descriptive material that does not constitute a statutory process, machine, manufacture, or composition of matter. Nonfunctional descriptive material may be claimed in combination with other functional descriptive multi-media material on a computer-readable medium to provide the necessary functional and structural interrelationship to satisfy the requirements of 35 U.S.C. 101.

Conclusion

11. Prior art fails to teach the method steps of claim 1.
